FARIHA AMIN : 201814061

Participant's Information Sheet

Purpose of Experiment:

The purpose of this experiment is to evaluate the usability of an AI based driver state monitoring system which has the features of detecting inattention, drowsiness, stress and showing current location and suggesting nearby parking spots if necessary.

Who is Associated with the Experiment:

Tasnia Iqbal	Undergrad Student	tasnia771@gmail.com
Tasneem Mubashshira	Undergrad Student	tmubashshira@gmail.com
Ifath Ara	Undergrad Student	ifatharadurba@gmail.com
Fariha Amin	Undergrad Student	farihaamin187@gmail.com

Participants Involvement:

Participating in this experiment will include answering pre-and post-questionnaires concerning the respective website and performing some specific tasks to evaluate the usability standard of AI based driver state monitoring system. The entire participation might take around 30 minutes.

Please fill up all the following required fields in capital letters completely and submit it to the concerned authority. Thank you.

Note: All information disclosed here shall be treated as confidential and not to be disclosed to any other party whatsoever or used for any purpose other than the website usability evaluation experiment purpose.
